

PADI Rescue Diver Course with EFR/Oxygen Provider

Course Overview

You already have some dives under your belt and are ready to expand your skills and take care not only for you but also for fellow divers? Why not go to the next level by becoming a PADI Rescue Diver? You will refresh your self-rescue skills, learn to recognise and manage stress in other divers and get prepared to deal with minor and major dive emergencies using a variety of different techniques. After practicing the skills with your instructor, you will put your knowledge and new skills into practice in realistic rescue scenarios. You learn to rescue distressed, panicked and unresponsive divers and how to use emergency management equipment.

If you cannot complete your course, we issue a referral form documenting the completed course elements. Unused dives, days of stay and uncompleted courses can be recovered within the next 12 months, whereby price changes due to seasonality or cost increases might apply.
